

RAHUL PAWAR

Full Stack Developer & AI Automation

[+91 7049668627](tel:+917049668627) | rpawar141199@gmail.com | rahulpawar1411.github.io/Rpawar.portfolio.site/

CAREER OBJECTIVE

Ambitious MCA graduate and Full Stack Developer seeking to leverage hands-on experience in MERN stack development and n8n workflow automation to build scalable, AI-driven solutions that optimize business operations.

TECHNICAL SKILLS

- **Frontend Architectures** - React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, GSAP
- **Backend & API Engines** - Node.js, Express.js, PHP, RESTful APIs, Webhooks, JWT Secure Auth, bcrypt
- **AI & Workflow** - n8n Workflow Automation, OpenAI API Integration, Context-Aware Chat Automation
- **Databases & Ecosystems** - MySQL, MongoDB, Git & GitHub, Postman, VS Code, n8n
-

PROFESSIONAL EXPERIENCE

- **Web Development & AI Automation Intern | *Greatwebsoft.in*** **Nov 2025 – Present**

During my internship, I focused on building AI-powered systems and automation workflows to make business operations faster and more efficient. I successfully deployed a live, smart chatbot on the company website that can understand and reply to customers using past conversation data. To support this, I designed database structures in MySQL and MongoDB to save chat histories safely. Additionally, I automated regular tasks like email systems using custom webhooks to reduce manual work by 40%, and created responsive, user-friendly web features using React.js.

KEY PROJECTS

- **AI Customer Support Automation Engine | *n8n, OpenAI API, PHP Backend, MySQL Database***

Built an automated chatbot that handles customer support questions in real-time. It uses a PHP backend to process messages and connects to OpenAI APIs via n8n workflows to generate smart answers. I also built a MySQL database to save conversation logs, allowing the AI to remember chat context and provide accurate help. Live Site: <https://www.greatwebsoft.in/>

- **MERN UserPost | *React.js, Node.js, Express, MongoDB, JWT Security***

Developed a full-stack social platform for creating and managing posts securely. Implemented user authentication using JWT and password encryption via bcrypt. Created robust REST APIs with Node.js/Express to manage backend data operations smoothly, including a custom image upload feature.

- **Interactive Immersive Portfolio | *HTML5, CSS3, Modern JavaScript, GSAP***

Designed a high-performance personal portfolio website to showcase my technical skills. Used the GSAP animation library to implement smooth scrolling effects, dynamic transitions, and modern UI elements, ensuring a highly engaging and fast user experience. EDUCATION

Master of Computer Applications (MCA) | *Sagar Institute of Research & Technology, Bhopal (RGPV University)*

CGPA: 7.50 / 10.0

Graduation: 2024
